

## OpEx Belt Training

The OpEx Belt is an exclusive program by Beyond Z which is customized to the specific needs of the client organization

The OpEx Belt is apt when the organization do not have sufficient resources to form project teams in order to drive separate improvement projects such as in Green Belt or Black Belt programs

Lean, Six Sigma and Quality tools and techniques covered in this workshop are selected based on the needs identified to help drive improvements in the client organization

The main objective of this workshop is to prepare candidates to focus on the key objective of driving Stability, Productivity and Quality in the company

Candidates who have completed this program can easily obtain Green Belt certification, by undergoing a short training to cover the gaps in the curriculum
